Description

Goal:

To connect the **Subjects page functionality on the admin end to the parent end**

So that:

Parents are able to **select subjects/titles of classes for their students when they are creating the student’s schedule**

Details:

Under the **subject column on the Schedule Builder**, parents should be able to select a subject and what we would call a “Title” on the admin end

Since at this point in the process, parents would have already selected the category/period in the previous dropdown, all subjects/titles from that selected category **should populate for the applicable student grade levels** that the admin had selected for the subject/title.

Please see the connection between the parent/admin end below:

 **Subject/Title Selection - Admin/Parent Connection**

[https://www.figma.com/file/8LI36Xr5VdIvRw3fekAC5d/MTH---Product-Review-\(Erin\)?node-id=42841%3A27034](https://www.figma.com/file/8LI36Xr5VdIvRw3fekAC5d/MTH---Product-Review-(Erin)?node-id=42841%3A27034)

To avoid any confusion, please note:

The title from the reference has been edited in the screenshot to match the title name on the parent side and Hunter's grade levels accordingly

Only part of reference 2 has been shown to demonstrate the title name entry

The below example shows the selection of **both a subject and a title**. If there are no titles associated with a subject, it is also possible that **just** the standalone subject is selected and reflected in the subject column (see reference 6 and the “Additional Rules” section to learn more about this)

https://mytechhigh.atlassian.net/si/jira.issueviews:issue-html/INFOCTR2-98/INFOCTR2-98.html

1/5

Additional Details:

 Note on Grade Levels and Alternative Grade Levels:

- **Reference 5: Subject Selection Dropdown with Alternative Grade Levels Showing**

Subject/Title Selection Design and Functionality

Please see an example of the “**cascading menu**” (**reference 6**) that the parent sees of a sample subject (Music)

In this example, the parent has already selected **Period 6** as an **elective category** and has moved to the **subject column**

- When the parent clicks on the “**Subject**” select dropdown, they should see all possible subjects (**Fine Arts, PE & Health, CTE**)
- When there are **one or more titles associated with a subject**, the parent should see an arrow “>” next to the subject name when they hover over the subject
 - Clicking on this subject/arrow should **expand all associated titles to that subject**
 - When the parent **clicks on a title**, it should **immediately be selected and populated in the subject column** (see this below with “Music”)

Please Note: Sometimes titles/subjects will have **associated pop-ups** that will need to be approved before they select that title/subject

Please see the related ticket here: <https://mytechhigh.atlassian.net/browse/INFOCTR2-1018>

Reference 6: Subjects/Titles Cascading Menu Example

Unable to render embedded object: File (89beb3cf-505a-4e61-883e-770033393f56#media-blob-url=true&id=d8f56e29-92b4-44f1-8151-f43795dc379c&collection=contentId-144244737&contextId=144244737&height=1834&width=2182&alt=) not found.

Additional Rules:

- If a Subject does not have any titles (ex: CTE), then the admin should be able to **directly select that subject**
- If there is only **one subject with no titles available**, it should be **pre-populated (reference Period 1 (Homeroom subject))**
- If there is only **one subject that has titles associated with it**, there should still be a **cascading menu (see below)**

Reference 7: One Subject with Multiple Titles

Unable to render embedded object: File (8d0a0a01-625a-41ee-baaf-05326e29bb28#media-blob-url=true&id=e57100f1-2828-41e9-b6e6-30f87f875369&collection=contentId-144244737&contextId=144244737&height=1690&width=1964&alt=) not found.

Admin Story:

Admin **sets up Subjects and Titles on the Subjects page**

Parent Story:

- Parent logs into InfoCenter
- Parent clicks on the “**Submit Now**” schedule notification
 - After navigating through/completing all enabled/required sections, the parent **lands on the Schedule Builder page**
 - Parent selects a period/category
 - **Parent can either:**
 - See that the subject has **pre-populated** (only if there is **one subject** associated to that period/category with **no titles**)
 - See the **blue select dropdown** (if there are **multiple subjects**)
 - Parent clicks on the dropdown
 - Parent sees the list of subjects
 - **Parent can either:**
 - **Select alternative grade levels for the subject**
 - Parent clicks on the “**Show options for other grades**”
 - Arrow changes directions to face up and the text now states “**Hide options for other grades**”
 - Parent sees alternative selection options
 - Parent selects alternative grade levels
 - **Select a standalone subject (that has no titles associated with it)**
 - Subject name populates in the “**Subject**” column
 - **Click on the arrow of a subject with titles associated with it**
 - Cascading menu with additional titles appears
 - **Parent can either:**
 - **Select alternative grade levels for the title**
 - Parent clicks on the dropdown and selects alternative grade levels
 - **Select a title**
 - Title name populates in the “**Subject**” Column

Done Criteria:

1. Parents should only be able to make a subject selection once a category has been chosen ([see category ticket here](#))
2. Subjects should only show in the parent view for their student **if the applicable grade levels of the subject correspond to the grade of the student**
3. If there is only **one subject with no titles available**, it should be **pre-populated under the subject column for that period**
4. If there are **multiple subjects**, the parent should see the blue “**Select**” menu dropdown
 1. When the parent clicks on the select dropdown, they should **see all associated subjects to that period/category**
 1. The subjects that will show in the dropdown **will have to have been checked off on the admin end to be visible for parents**

10/5/22, 4:17 PM

[#INFOCTR2-98] Parent/Admin - Connect Subjects and Titles Created by Admins to the Parent End

2. If a subject has **titles**, there should be an **arrow (>) next to the subject name when the parent hovers over the subject**

3. When a parent clicks on the arrow, the list of titles associated with the subject should populate in a cascading menu format and parents **should be able to select a title**

1. When the parent selects a title from the dropdown, the **title name should populate under the “Subject” column for that period**

5. If a Subject does not have any titles, then the **parent should be able to directly select that subject and it should populate under the “Subject” column for that period**

6. If there is only **one** subject that **has titles associated with it**, there should still be a **cascading menu to show the associated titles to that subject**

7. Parents should **not** be able to select only a subject if it has titles, they should **be required to take the next step in selecting a title**

8. Parents should see the **“Show options for other grades” as the last option on both the subjects and titles dropdowns if alternative grade levels were inputted by admins**

1. Parents should be able to click on **“Show options for other grades”** if there were alternative grade levels inputted on the admin end for that specific subject/title

2. When the parent clicks on **“Show options for other grades,”** they should be able to select those subjects/titles

1. The arrow for **“Show options for other grades”** should change directions when the parent clicks on it

2. If the alternative grade levels are showing, the **grade ranges need to be listed next to the Subject/title**

Comments

Comment by Petya Yankova [28/Sep/22]

Hi! Erin Sublette This one should be all set, but I was wondering if we could make an additional design with the “show options for other grades” expanded. We currently only have examples of that with the providers/courses. Let me know if you think that is necessary, or I could also use the provider example and make a note that it should work in the same way for subjects/titles.

Let me know what you think/if there is anything else to add on here! 😊

Comment by [Petya Yankova](#) [29/Sep/22]

Hi ! [Erin Sublette](#)

Yes, perfect thank you! I think the only thing we will need to remove is the "Course Catalog" link since the subjects/titles do not have associated links
