Parent - Creating a Schedule UI & Imp...

To Do

Sprint:

Sprint 26

Rank:

0ji005uk:000000000004

Description

Goal

To add **general functionality** to the Schedule Builder Page

So that:

Parents are able to navigate elsewhere, save changes to their schedule, and look at previous years' schedules

Details:

On the Parent Schedule Builder page, parents will be able to take several actions that do not directly involve creating the schedule. Please see the reference below with these functionalities outlined:

Parent Schedule Builder: [https://www.figma.com/file/8LI36Xr5VdlvRw3fekAC5d/MTH---Product-Review-\(Erin\)?node-id=42841%3A27152](https://www.figma.com/file/8LI36Xr5VdlvRw3fekAC5d/MTH---Product-Review-(Erin)?node-id=42841%3A27152)

Please see the details of each feature associated with the numbers above:

1.Back Chevron

Scenario 1:

If the admin clicks on the back chevron in the top left corner **without** making any additions/changes to the Schedule Builder page:

- They should be sent back to the previous page in the Schedule Builder depending on what has been enabled for that region (at this point in the schedule builder process this could be either the diploma-seeking, testing preference, or testing preference opt-out page)

Scenario 2:

If the admin clicks on the back chevron in the top left corner after making additions/changes but **without saving them as a draft, they should see the “Unsaved Changes” pop-up** (see below)

🔥 **Unsaved Changes Pop-up:** [https://www.figma.com/file/8LI36Xr5VdlvRw3fekAC5d/MTH---Product-Review-\(Erin\)?node-id=35627%3A25326](https://www.figma.com/file/8LI36Xr5VdlvRw3fekAC5d/MTH---Product-Review-(Erin)?node-id=35627%3A25326)

Unsaved Changes

Are you sure you want to leave without saving changes?

Cancel

Yes

If the admin clicks “Cancel”

- The pop-up will close and they will **remain on the Schedule Builder page with their additions/edits**

If the admin clicks “Yes”

- The pop-up will close and they will be **sent back to the previous page of the Schedule Builder**
- **No changes will be saved**

Please Note:

If a parent tries to navigate away from the page by clicking elsewhere (for ex: if they click on “Quick Links” from the side bar menu), they should also see this “**Unsaved Changes**” pop-up

Scenario 3:

If the admin clicks on the **back chevron** after saving changes/additions to the page by using the “Save Draft” button (see #3), they should be sent to the previous page in the Schedule Builder

2. Years Dropdown

The years dropdown in the **top right corner** will allow parents to see previous years' schedules (if any)

- When the parent **clicks on the years dropdown and selects a previous year**, the page will populate with that year's schedule

Please Note: This functionality should only **show previous years**, not future years that were added in the years settings. If the student has **no approved schedule history**, there will be **no** past years shown in the dropdown.

3. “Save Draft” Button

The parent should be able to work on the schedule and **save it as a draft throughout the process**. The “Save Draft” button will give them the **option to save and come back to the Schedule when they want to work on it**.

- When a parent clicks “**Save Draft**”
 - **All changes/edits made to the page will be saved**
 - There will be a **pop-up confirmation that their changes have been saved (see below):**

 **Save Draft Confirmation:** [https://www.figma.com/file/8LI36Xr5VdlvRw3fekAC5d/MTH---Product-Review-\(Erin\)?node-id=80851%3A43680](https://www.figma.com/file/8LI36Xr5VdlvRw3fekAC5d/MTH---Product-Review-(Erin)?node-id=80851%3A43680)

Saved

Great start!

Your student's schedule has been saved.

Please return to submit the schedule before the deadline.

Ok

- When the parent clicks “**Ok**” on the pop-up, it should close
- The parent should **remain on the Schedule Builder page after the pop-up has closed**

Parent Story:

- Parent logs into InfoCenter
- Parent clicks on the “**Submit Now**” schedule notification
 - After navigating through/completing all enabled/required sections, the parent **lands on the Schedule Builder page**
- **Parent can either:**
 - Click on the **back chevron without** making any additions/changes to the page
 - Parent is sent back to the **previous page in the Schedule Builder**
 - Click on the **back chevron (or try to navigate away from the page by clicking elsewhere) after making additions/changes but without saving them as a draft**
 - Parent sees the “**Unsaved Changes**” pop-up
 - **Parent can either**
 - Click “**Cancel**”

- The pop-up will close and they will **remain on the Schedule Builder page with their additions/edits**
- **Click “Yes”**
 - The pop-up will close and they will be **sent back to the previous page of the Schedule Builder**
 - **No changes will be saved**
- Click on the **back chevron after saving changes/additions to the page by using the “Save Draft” button**
 - Parent is sent back to the **previous page in the Schedule Builder**
- Click on the **years dropdown and select a previous year**
 - Schedule Builder page populates with the previous selected years' schedule
- Click on the **“Save Draft” button**
 - All changes/edits made to the page **will be saved**
 - Parent sees the **pop-up confirmation** that their changes have been saved
 - Parent clicks **“Ok”**
 - Pop-up **closes and the parent remains on the Schedule Builder page**

Done Criteria:

1. If the admin clicks on the back chevron in the top left corner **without** making any additions/changes to the Schedule Builder page:
 1. They should be sent back to the **previous page in the Schedule Builder depending on what has been enabled in the region**
2. If the admin clicks on the back chevron in the top left corner after making additions/changes but **without saving them as a draft, they should see the “Unsaved Changes” pop-up**
 1. If the admin tries to **navigate elsewhere in the InfoCenter without saving changes as a draft, they should also see the “Unsaved Changes” pop-up:**
 1. If the admin clicks **“Cancel” on the pop-up**
 1. The pop-up will close and they will **remain on the Schedule Builder page with their additions/edits**
 2. If the admin clicks **“Yes” on the pop-up**
 1. The pop-up will close and they will be **sent back to the previous page of the Schedule Builder**
 2. **No changes will be saved**
3. If the admin clicks on the **back chevron after saving changes/additions to the page by using the “Save Draft” button, they should be sent to the previous page in the Schedule Builder**
4. When the parent **clicks on the years dropdown and selects a previous year, the page should populate with that years' schedule**
 1. Parents should only be able to see previous years in the years' dropdown that have **schedule builder history, not future years that have been created**
5. When a parent clicks **on the “Save Draft” button**
 1. All **changes/edits made to the page will be saved**
 2. There **will be a pop-up confirmation that their changes have been saved**
 1. If a parent clicks **“Ok” on the pop-up, it should close and they should remain on the Schedule Builder Page**

Comment by [Petya Yankova](#) [23/Sep/22]

Hi [Erin Sublette](#)

This one should be all set! Sending over!
